

## PEP: Promoting Effective Partnering

**PEP offers knowledge and resources on partnering to practitioners working in partnerships for the Sustainable Development Goals (SDGs). Through a newly created facility, people can learn about partnering, access help, share experiences and exchange ideas.**

In 2015, world leaders agreed on the SDGs. Implementation of these goals requires a collective effort by governments, research institutions, the private sector and civil society organisations – enshrined in SDG 17 ('Partnership'). The goals are designed to address poverty, hunger, food security, sustainable agriculture, education, gender equality and much more.

But partnering can be challenging. For this reason, a group of leading thinkers in partnering have been working together over the past 15 months to pool their knowledge and rich practical experience to identify and share what it takes to *really raise the bar of effective partnering*.

Go to [www.effectivepartnering.org](http://www.effectivepartnering.org) to see what they have come up with to enable practitioners across the globe to improve their partnering efforts and bring about transformational results. The information presented is not intended to be prescriptive – rather, we invite partners to question our approaches as well as their own. There is no one-size-fits-all solution.

The next step for PEP will be to activate a vibrant platform offering opportunities to learn from the experience of peers and to seek support when things are not going according to plan. PEP will officially be presented during the [Second High Level Meeting](#) of the [GPEDC](#) in Nairobi (November 28 - December 1).

For more information, please check out [www.effectivepartnering.org](http://www.effectivepartnering.org).

Do you have any questions? Contact PEP coordinator Marieke de Wal at [info@effectivepartnering.org](mailto:info@effectivepartnering.org) or at +31 10 408 1126.

The PEP facility is supported by the Dutch Ministry of Foreign Affairs as co-chair of the GPEDC.
