There is a growing demand in Asia and internationally across all sectors for greater competence in managing the partnering process in multi-stakeholder partnerships **more effectively and efficiently**. This is particularly so with the government, business, not for profit, environment and welfare sectors, along with humanitarian sectors working on disaster, human trafficking and other such issues.

Increasingly, agencies are seeking to work together across organisations, sectors, geographical regions to address complex social and development problems. However, partnering, whether across sectors and geographical divides, or among units of the same organisation, is fraught with challenges.

This unique and highly sought-after program provides those working in and on partnerships with frameworks, techniques and skills development to build their confidence and competence as partnership brokers. It seeks to evolve frameworks from practice and builds on experiences of partnership brokering in diverse contexts and different models of partnership.

A **partnership 'broker'** is an **intermediary** building effective and innovative collaboration between partners. Partnership brokers can be either **internal** – responsible for negotiating or managing partnerships on behalf of their organisation – or **external** – those offering independent partnership brokering services.

Established in 2003, the globally recognised **Partnership Brokers Training** builds the practical brokering skills and professional practices necessary to address complex challenges in the partnering process at all phases of a partnership's life cycle.

"This programme has given my partnership brokering work a soul. The delivery was precise and to the point. I now have a clear picture of the entire brokering process and how best I can execute my role. I have renewed confidence and increased skills. It was an excellent experience."
