

PARTNERING for INNOVATION

Overview

Partnering Cycle & Innovation

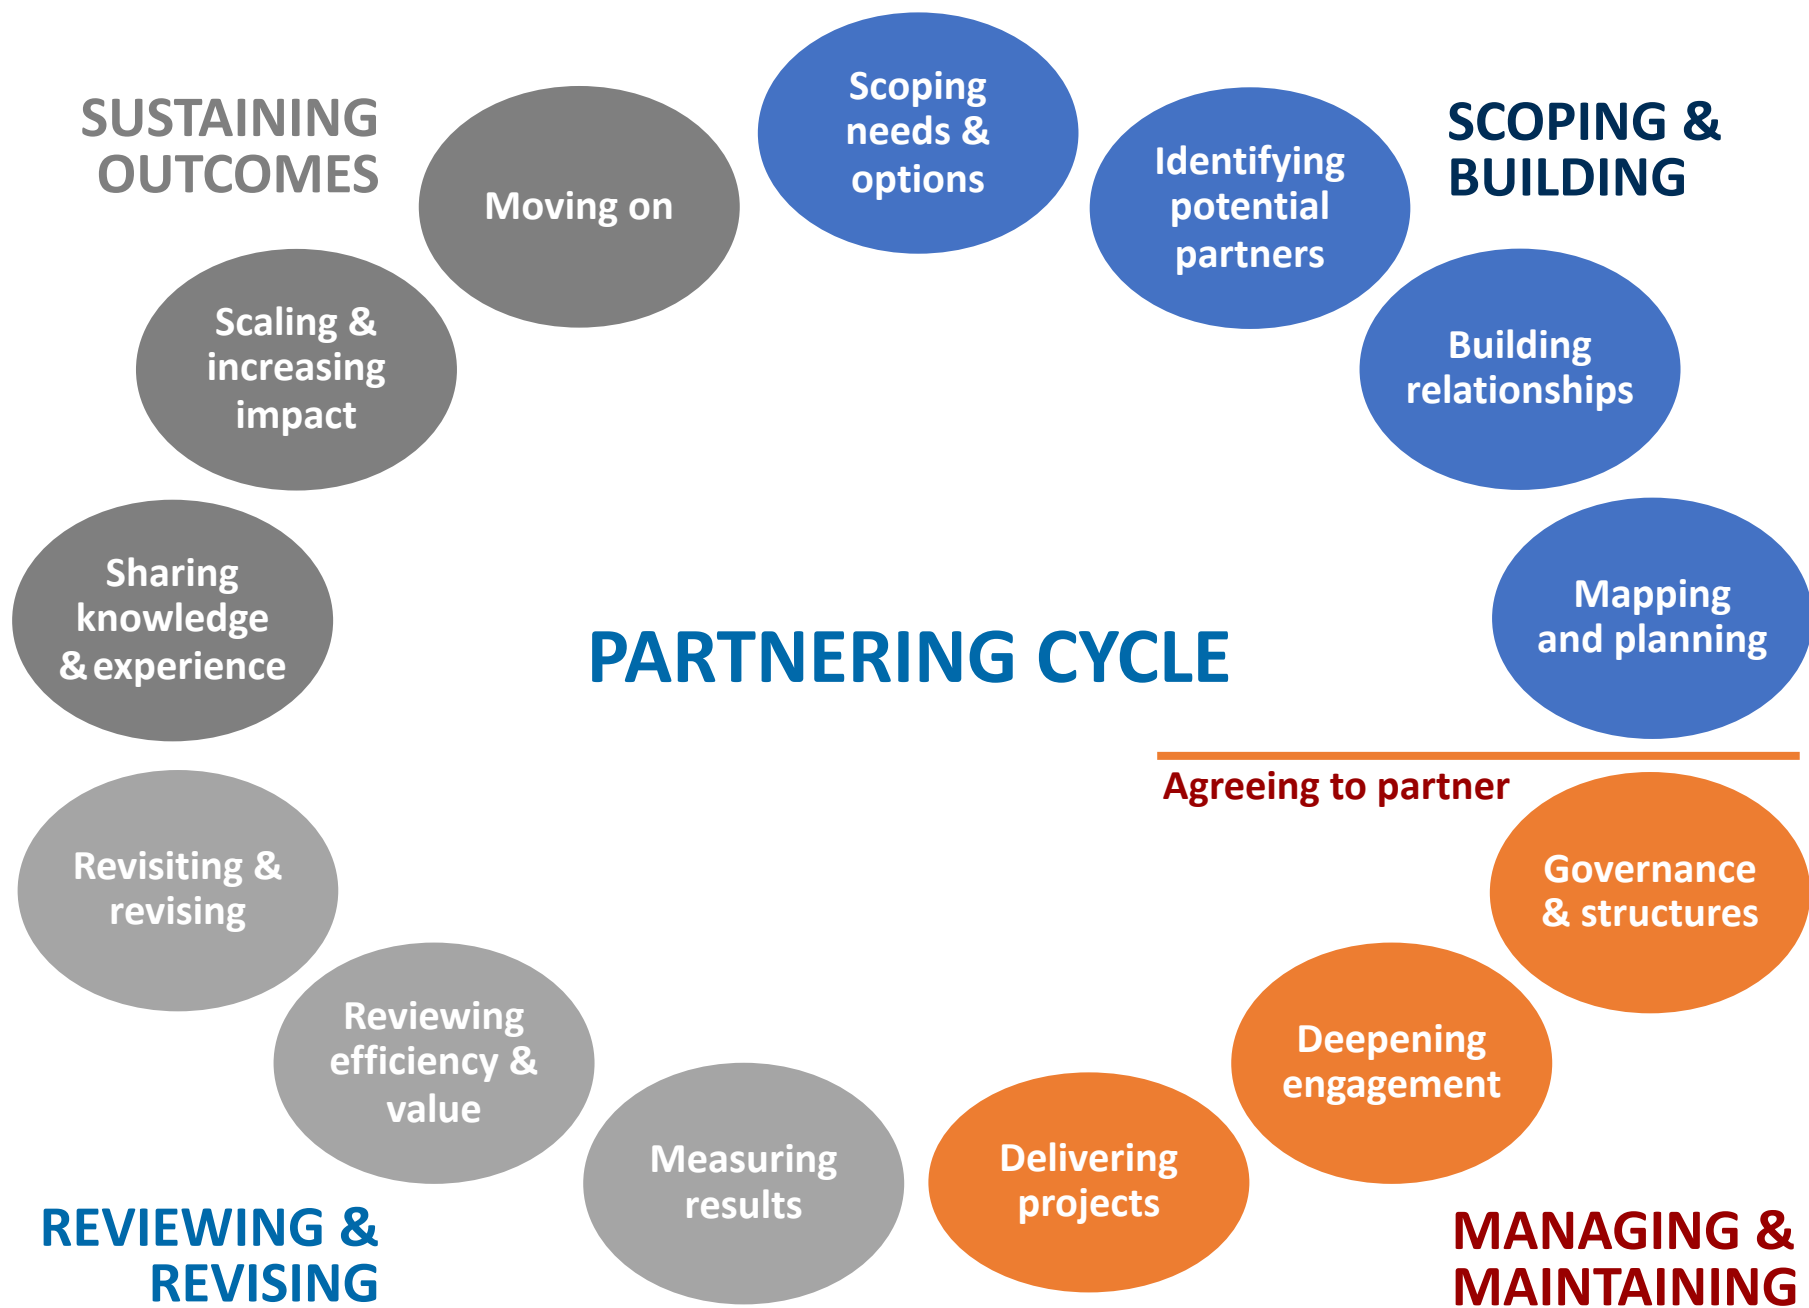

3 Reflections

3 Challenge Areas

Innovation through the Partnering Cycle

Mapping Innovation across the Partnering Cycle

Results of Inter agency workshop in Jordan 2019

3 Reflections

Effectuation vs Causation

Swap the lens

Transformational to Transactional

1. Effectuation vs. Causation

Effectuation Means and Goals

Managerial Thinking

Coordinating given means for a single goal

Adapted from Futurelearn

Effectuation Means and Goals

Managerial Thinking (Causal)

Coordinating given means for a single goal

Entrepreneurial Thinking (Effectual)

Imagining possible goals with given means

Adapted from Futurelearn

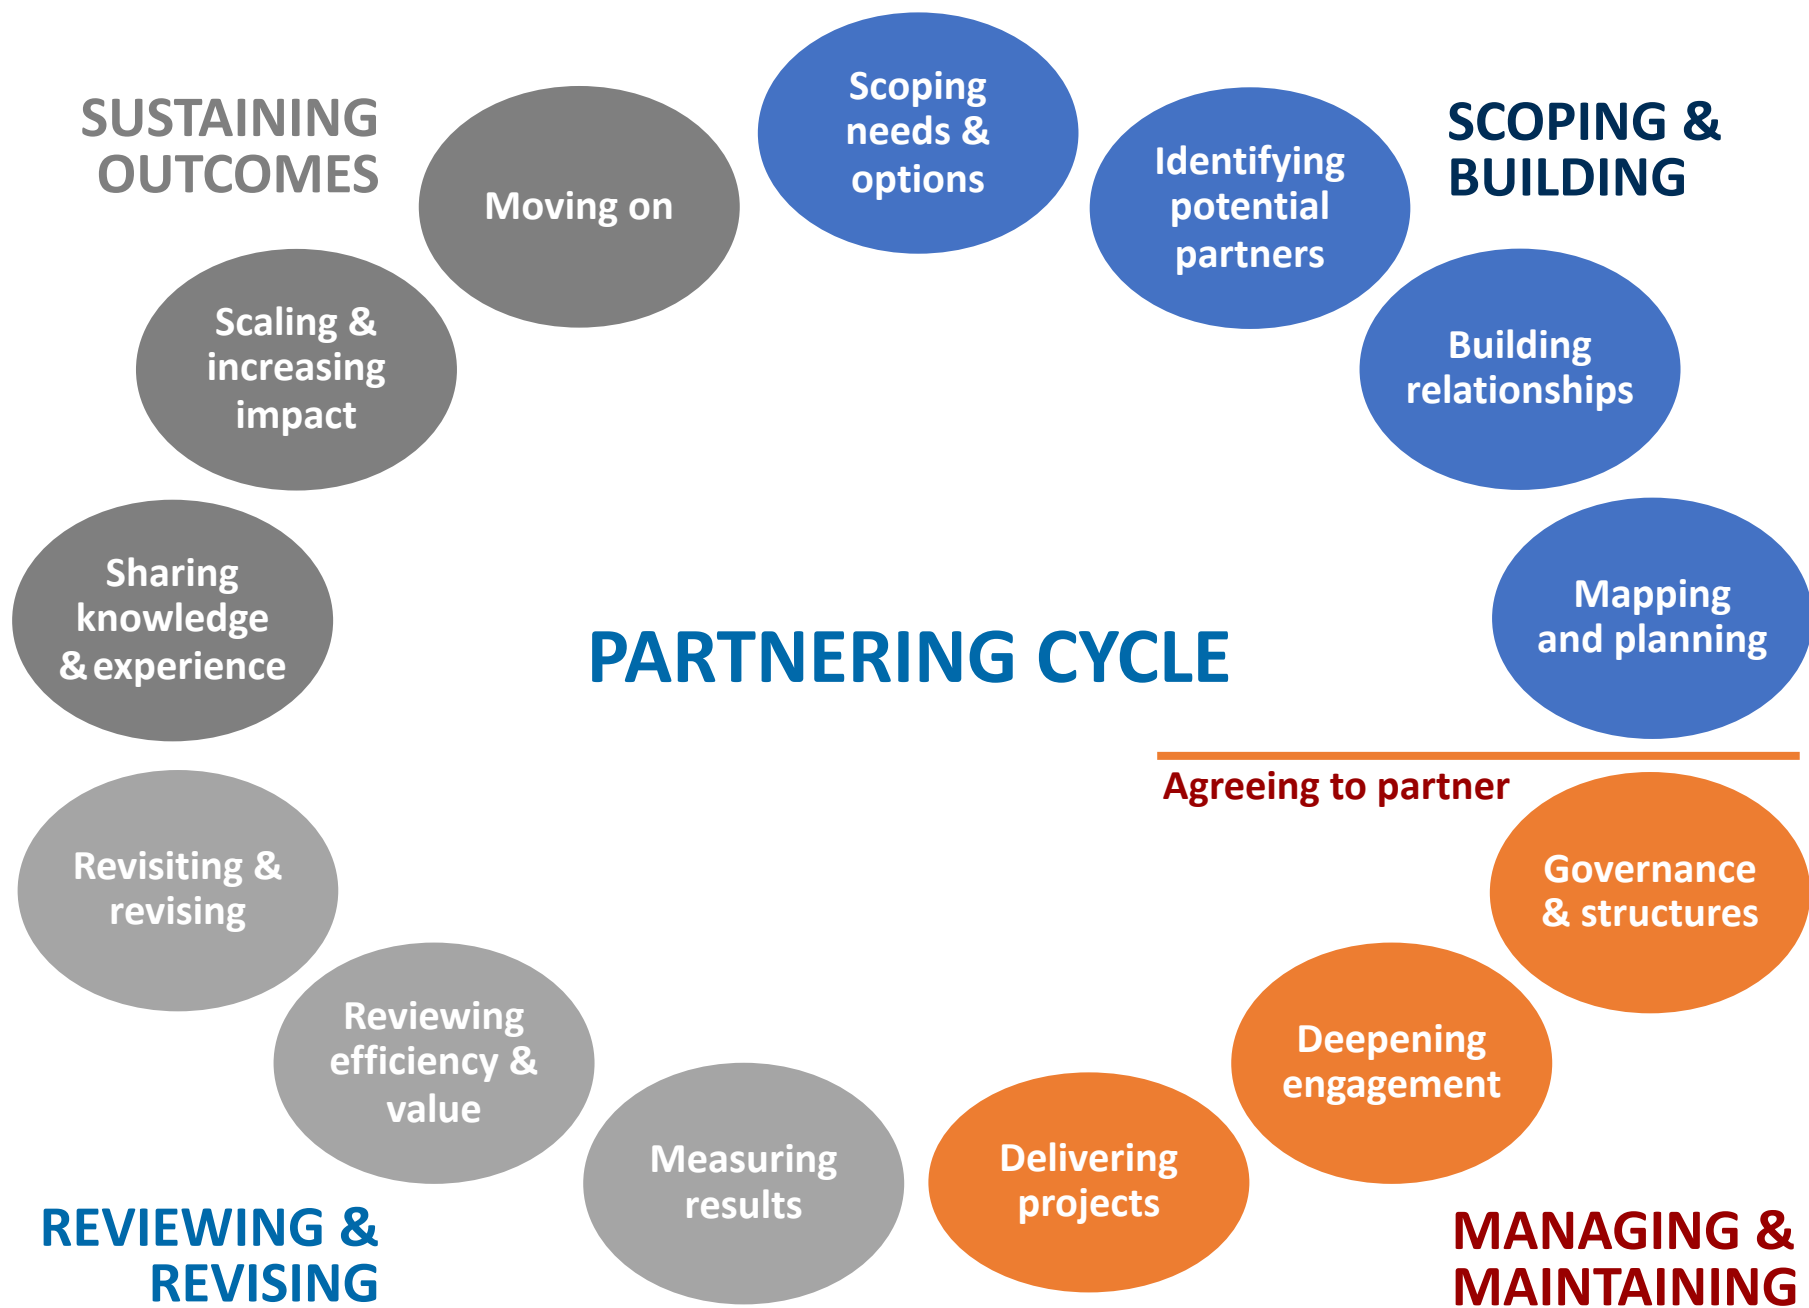

Effectuation Crazy Quilt

2. Swap the Lens

Basic Innovation Process

3. Transformational to Transactional

Partnerships often become increasingly **transactional** as innovation goes to scale

Prototype

Pilot

Scale

The **transformational** potential of the innovation often increases as it goes to scale

Partnerships through the Innovation Process

Partnership challenges across the Innovation Process

Prototype

Pilot

Scale

Challenges at Prototype Stage

- Different requirements
- Unknown level of value
- Moving from co-creation to partnership

Pilots

- Searching for implementing partners
- New resources means new goals?
- Different clock speeds

Scale

- Capability and interest divergence
- Managing demands
- Transformational to transactional pressure

Thank you
